Provincial Library

Edmonton

VOL. VIII, NO. 30.

CROSSFIELD, ALBERTA. THURSDAY, JULY 22nd, 1915.

PRICE \$1 A YEAR.

LAUT BROS.

Binder Twine \$9.25
per cwt.

WE are soliciting orders for 550 foot Binder Twine for delivery early in August, at a net price of 9 1/4 cents per lb., f.o.b. car Crossfield.

In connection with this we offer privilege of cancellation up to August 15th in the event of crop failure.

Remember this is a net price, without any extra commissions, and we feel that owing to the unsettled condition of the twine market to-day, this is an exceptionally low price.

We will be glad to book your order now.

Laut Brothers,

P. I. McANALLY, Manager.

Local and General:

In the separate High School report of Edmonton, for Grade IX Examinations, we notice among the successful pupils the name of Frances McAnally.

Mrs. C. Wicks will receive on the afternoon of Thursday, 29th July, between the hours of 3 and 6.

The Misses Farnell and Upgordon from Halkirk, Alberta, are visiting for a few days Mrs. Dan Shaver.

Mr. Andrew Wilfert, of Seattle is on a visit to his daughter Mrs. H. F. Benedict.

On Sunday evening at the Union Church, Mr. Berry will take as his subject: "Meaning of the Victory, what next?" All are welcome.

The Elocutionary contest at the Union Church took place on Monday evening last. The event was quite the success it deserved, and the recitations were interspersed with vocal music. Miss Ferguson, of Inverlea, was the prize winner out of six competitors. The meeting was presided over by Mr. A. R. Thomas, and the judging was in the hands of Miss Wicks, Miss Halliday and Mr. McGregor.

Parents who have children who are eligible for the High School, and wishing them to commence Next School Term are requested to see Mr. A. R. Thomas, as arrangements must be made at once.

Mr. W. McRory was a visitor to Banff for a few days last week end and reports having had a good time, the weather being ideal.

Seems as though we did live in a civilized country after all. Alberta is dry after all.

The automobile party that left Crossfield, on July 12th, for Banff, arrived back in town on Wednesday, but were too late to vote. They report having spent a very enjoyable time.

The Banff Excursion train passed through Crossfield on Thursday morning well filled. Quite a number from Crossfield taking advantage of this popular excursion.

Mr. J. L. McRory left to day for Banff, where he will spend a week or more. Here's hoping he has one big time.

We are to have a "Woodman Camp" in Crossfield, the organization will take place on Monday evening next. Now is your time to get in on the Charter.

Just as we go to press we hear of the death of Mrs. Eagleson's mother Mrs. Eliza Ellis, of Innisfail, aged 86 years.

On Tuesday, evening July 27th, Mesdames Purvis, H. Whitfield, S. Jose and E. Shaw will give a Moonlight social and Entertainment in aid of the Crossfield Branch of the Red Cross Society, at the home of Mrs. F. Purvis, from 8.30 to 11 p.m. a continuous program of music and other entertainment will be given. The Crossfield Choral Society will make its initial appearance, and will render Patriotic and National airs. A quartette composed of local men will give several selections, also vocal solos will be given by Misses Whitfield and Colling, Messrs. Jose, Edwards, Thomas, E. Shaw and others, including a new patriotic song, words and music written by a Crossfield resident. Piano, violin and cornet music, club swinging and recitations will intersperse the vocal numbers promising a splendid program. Refreshments and Ice Cream. Everybody welcome. No admission fee, but boxes will be placed for contributions in aid of the Red Cross Society.

WE KEEP AT IT LEST YOU FORGET

To consult us about your Eavetroughing. Storage Tank. We manufacture in Crossfield Tanks from One to Fifty Barrels capacity.

We build an eavetrough on your building at 12 1/2 cents per foot.

All our work is done by experienced and capable workmen, and we guarantee satisfaction.

If you think about
HEATING YOUR HOUSE WITH A FURNACE
Let us give you an Estimate.

We are experts in this line and the first cost, everything considered, is cheaper than stoves.

Do not forget, we at all times carry a full line of
Hardware, Paints, Oils, Stoves, Ranges, Tinware, Graniteware, and other Goods usual to an up-to-the-minute Hardware Store.

LET US SERVE YOU.

W. McRory & Sons,

HARDWARE SPECIALISTS AND HEATING EXPERTS.

CROSSFIELD DISTRICT ASSOCIATION U.F.A.

THIS SPACE is retained for the use of Members of U.F.A. to advertise anything they may want to Sell, have to Buy or Exchange.

It is hoped that liberal patronage will be given this space, and listings not later than Tuesday evening of each week handed to the Editor or A. A. Hall, Secretary.

For Sale.—Oats, Wheat and Barley.—Apply R. M. McCool.

For Sale.—Two 2-year old Shorthorn Bulls, or will trade for Stockers.—G. Treverton Jones.

For Sale.—A few young Brood Sows, also some Spring Pigs. Apply L. V. Bliss.

To be Sold, or will Trade for Young Stock, 3 good Shorthorn Dairy Cows. Apply Wm. Brandon, 6 miles S. of Crossfield.

For Sale.—One Hereford Bull. J. Roedler. Phone 417. Lost or Strayed.—One Yearling Steer, branded ICU on left ribs, also one Cow same brand. I. C. Hubbs.

Members of Sunshine Union: Final limit for 1915 dues expired July 1st. Members in arrears will be deprived of the privileges of the Union.

Creamery or Cheese Factory

Information supplied by the North Dakota Experimental Station

Which pays best, the creamery or cheese factory? The following illustrations will give a basis for answering this question.

One hundred pounds of a per cent. milk contains 4 pounds of butter fat, which at 30c. will bring \$1.20. If butter brings 30c. the return will be \$1.20, the overrun being 50 per cent.

This same 100 pounds of a per cent. milk, turned into cheese, will produce 10½ pounds, which at 14 cents a pound would bring \$1.47. The whey, which is the by-product of cheese, is worth 10 cents per 100 pounds, while the skim milk, the by-product in butter making, is worth 30 cents a hundred, leaving the gross return from the 100 pounds of milk made into cheese at \$1.57, and \$1.47 if made into butter. A variation in price might reverse these figures.

In cheese making the whole milk must be taken to the factory, and it must be perfectly sweet when it goes there. In butter making the milk can be separated on the farm, and just before it is taken to the factory it should start to sour it will still make butter, though not as good as if it reached the factory perfectly sweet. This means that the cream need not be hauled every day, and the bulk of the cream is much less than that of the milk. In the case of 30 per cent. cream from a per cent. milk the bulk is about one-eighth, which is quite an item.

The cost of making the butter will be at least 2 cents a pound, depending upon how much is made, or 14 cents for making milk. The overrun will amount to 50 per cent. of a pound, making a total of 1½ pounds of butter. The cost of making the cheese will be 10½ cents per pound, or 16 cents for the 100 pounds of a per cent. milk, depending upon the amount made. If small amounts of either butter or cheese are made, the cost per pound will be more than the prices given.

The cheese factory can be operated with a less number of men than the creamery. However, one thing that must not be lost sight of is that the milk for cheese making must reach the factory perfectly sweet, and must be cooled every day. The milk for butter making need not be hauled when cream is sold.

Ask for Minard's and take no other.

Airmen Are Sportsmen

The fate of an aviator who comes to grief generally becomes known to the public, and through the medium communicated to his friends at home. The explanation of this is that a practice has sprung up on both sides of dropping messages into the opposing line reporting exactly what has happened to any aviator who has been forced to descend. One of these messages dropped in the British lines showed an intimate knowledge of London. After mentioning that a particular aviator had been taken prisoner, but was uninjured, the message continued: "Hope the British aviators are going strong. Give my regards to Leicester Square, dear Piccadilly, and Mayfair. Sorry can't stay."

A certain fellow-feeling has been established between the two forces in the north of France, and an aviator who is compelled to descend in the enemy's lines is always sure of kind treatment if he gets in touch with members of the flying corps. Don't Submit to Asthma—If you suffer without hope of breaking the chains which bind you to bed, try another day the purchase of Dr. J. D. Kellogg's Remedy. A trial will drive away all doubt as to its efficacy. The relief that comes will convince you more than anything that can be written. When help is so near, why suffer? This matchless remedy is sold by dealers everywhere.

Jeffrey

He became captain at 24, and there he stuck. His toiled hair became streaked with grey, and he was still a captain. But he knew his powers. On one of his visits home he urged upon his father the necessity of digging trenches to carry off the superfluous moisture of the spring food in his fields. In my cousin's trenches, Great man metier he said. And we may be thankful that the construction of trenches was the "Jeffrey" matter. Certainly he turned it to good account during the present war. And it was a spall and fort builder that he won promotion. In 1884 Jeffrey was sent to Fomeux, where he won a decoration and the nickname of "the man with the eyebrows." A colleague who was with him in Indo-China said of him: "He seldom smiled, and spoke still more rarely, and he never punished aviators as an extreme case. He natives feared him because of his all-time loyalty to his country and his justice." The London Citizen.

Our Trade With Italy

Italy, our latest ally in the struggle, did a total trade with Canada last year of \$2,892,000. Our imports from Italy amounted to \$2,147,000, and our exports to \$645,000. Undoubtedly one of the greatest effects of the war has been the commercial relations between the various countries which now comprise the allies—Montreal, Journal of Commerce.

A One-Man Submarine

A former United States naval officer has invented a one-man submarine carrying a full sized torpedo in its bow, and with a plug that automatically closes the opening when the torpedo has been fired.

The Hope of Disarmament

(Long Haldane, in an interview with the Chicago Chronicle)

If the allies win—if Germany, who has carried her military preparations to a pitch her neighbors, and even herself, have not—I do not imagine any nation in the future will be likely to pile its arms in armaments. If Germany, armed as she was armed, could not win, how could any nation hope to win by means of arms? I am hopeful that the world, as a result of this war, will get rid of a great part of the burden of armaments. I am hopeful that civilization is going to do something to defend itself against war.

We now know that the effects of war cannot be localized. We know that two considerable powers cannot fight without inflicting disturbance and loss on the whole world. Definite knowledge is necessary to deflate action. I believe that the world is going to do something to prevent the outbreak of another war. It is not going to out of ambition or fear, or because of any other influence or motive, will be permitted to go to war. This means that differences somehow must be settled by arbitration. If the world had been so organized last July, Germany could not have refused to accept our proposal for a peaceful settlement of the issues at stake.

Sunflowers For Poultry On the prairies, where in many cases the birds are scarce, the poultry have some difficulty in finding shelter from the sun during the hot weather. To appreciate the advantage of the shade provided by every building, tree, post or implement that may be used.

Generally speaking, sunflowers are planted in the same manner as wheat, except that they develop better if the plants are placed about a foot apart. They do not require particularly rich soil, and are able to resist considerable drought. The numerous, broad leaves of the sunflowers make them especially desirable as a source of shade for poultry. The seeds may also be dried and stored for winter feeding. These sunflower seeds have a laxative effect when fed to poultry.—Nor-West Farmer.

The Nation's Task The Germans have made us a prouder if a sadder, people than we were. We have learned this war in large measure unprepared—in defence of one of the smallest, most prosperous, and least ambitious nations upon its frontier, contrary to Germany's treaty engagements and ours, was violated. We should have henceforth pursued the war to its only possible end in the full knowledge that we are championing not merely the cause of freedom in Europe, but the cause of the great good that may well hold our heads high today. We could, at the price of honor, have remained out of this struggle, and have chosen the stony road.—London Daily Telegraph.

I was cured of Bronchitis and Asthma by MINARD'S LINIMENT. L. S., P.E.I.

"Thump-rattley-hang!" went the plan. "What are you trying to play, Jane?" called out her father from this next room.

"It's an exercise from my new instruction book, 'First Steps in Music.'" she smiled.

"Well, I knew you were playing with the music, but this is grimy; but don't stop so heavily on the key—It disturbs my thoughts."

"Why did you not help the defendant in the fight, if that's the case?" asked the lawyer with contempt and answered by a tone of pleading scorn, "For the sake of 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

When he is troubled with constipation, indigestion, vomiting or worms give him Baby's Own Tablets. They sweeten the stomach, regulate the bowels and cure the troubles simply because they banish the cause.

Concerning them the Medical Dictator, St. Leonard, Cex, writes: "We are well satisfied with Baby's Own Tablets, which we have used for many years when suffering from constipation and vomiting." The Tablets are sold by medicine dealers, or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Would Hang the Kaiser Germany is convicted by the very rules of international law which it has helped to frame and appealed to so often. To what lengths will the spirit of militarism carry the German government, that it shocks the world by deliberate premeditated murder, and the wanton brutality of the German soldiers, who have killed times the number of the innocent, and have committed crimes of blood which no man can countenance.

The Marquis of Bute tells an amusing story about a certain clergyman who asked a small boy: "You are a little bit of a clergyman?" "Grandpa," was the reply.

"I am very busy with you," said the clergyman, "if you will promise to keep in line awake during the sermon I will give you a penny a day."

The boy agreed, and for the next few Sundays the old grandfather was very busy. One Sunday, however, the old grandfather was so tired that he fell asleep during the sermon. The clergyman was delighted at the success of his little scheme and handed over the weekly penny according to the contract.

One Sunday, however, the old grandfather was so tired that he fell asleep during the sermon. The clergyman was delighted at the success of his little scheme and handed over the weekly penny according to the contract.

"I am very busy with you," said the clergyman, "if you will promise to keep in line awake during the sermon I will give you a penny a day."

"I don't matter," replied the boy coolly; "grandpa gives me two pence not to disturb him."

Johnny—"What is an expert, pat Pa?"—A fellow who tells others how to do the things he can't do himself.

Germany's Supply of Copper About nine-tenths of Germany's supply of copper comes from the United States and her dependence at the present time is completed by the current fact that the chief supplementary sources on which she has previously relied—Australia, Belgium, Japan, and the United States—are now all in Germany's hands. The only neutral country which supplies copper to Germany is Sweden but the amount is small, and unless we are mistaken, Sweden has prohibited exportation. London Times.

The Oil For the Farmer—A bottle of Dr. Thomas' Electric Oil in the house will save many a journey for the doctor. It is not only good for the children when taken with colds and coughs, but for the mother who suffers from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

One More "Scrap of Paper" Contrary to Article 3 of the Hague Convention, which forbids the use of torpedoes which do not become harmless after they have missed their mark, examination of torpedoes from German submarines recently found in the English Channel proves that their immersion apparatus had been systematically jammed so as to turn the torpedo into a floating mine. This is a fresh violation of international law.

PRESIDENT SUSPECT

MADE IN CANADA

METROPOLITAN FASHIONS FOR WOMEN EVERYWHERE.

A new and convenient means whereby women in all parts of Canada may avail themselves of the latest styles shown in Montreal—and at very low prices—is provided by Almy's Limited, the biggest store in the Eastern metropolis. They have just issued a "Summer Bargain Bulletin" showing a bewildering variety of the very latest things in women's and misses' shirtwaists, blouses, skirts, summer dresses, hats, lingerie, and dainty garments for children and babies.

This interesting little booklet, filled with items of greatest interest to women, will be sent free upon request, and articles ordered from it will be sent promptly by parcels post, with an absolute guarantee of the purchaser's satisfaction. Almy's Limited are now conducting a Department Store in the location formerly occupied by Sargent's, and the new management have taken the service of Montreal's largest store up to a very high standard. Request for the "Summer Bargain Bulletin" should be addressed to Almy's Limited, Montreal, Department H.

Save Us From Our Friends Mrs. Crawford—I suppose they wondered how we could afford an auto. Mrs. Cavanaugh—Not exactly. They asked if I knew how much you owed on it.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

A farmer wrote to the editor of an agricultural paper to follow him to a horse that has been afflicted for the past year with periodical fits of dizziness. Please let me know what he should do with him, as he seems to get worse instead of better. I am afraid he will be under the knife something is not done soon." In the next issue this answer appeared: "When the nag is looking all right, sell him to some one."

ONLY STEEN, GOSNOLD

Tells How She Was Made Well by Lydia E. Pinkham's Vegetable Compound.

New Orleans, La.—"I take pleasure in writing these lines to express my gratitude to you for the good work you have done for me. I am now 16 years old and work in a tobacco factory. I have been a very sick girl but I have improved wonderfully since taking Lydia E. Pinkham's Vegetable Compound and feeling a thousand times better."

—Miss AMELIA JACQUELARD, 2861 Tohopeulana St., New Orleans, La.

St. Clair, Pa.—"My mother was alarmed because I was troubled with suppression and had pains in my back and side, and severe headaches. I had pimples on my face, my complexion was sallow, my sleep was disturbed, I had nervous spells, was very tired and had no ambition. Lydia E. Pinkham's Vegetable Compound has done for me what no other medicine could. I am now a healthy girl and feeling a thousand times better."

—Miss AMELIA JACQUELARD, 2861 Tohopeulana St., New Orleans, La.

There is nothing that teaches more than experience. Therefore, such letters from girls who have suffered and been restored to health by Lydia E. Pinkham's Vegetable Compound should be as lesson to others. The same remedy is within reach of all.

If you want special advice write to Lydia E. Pinkham Medicine Co. (consultants), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Crossfield Machine Gun.

Crossfield like several other places does not intend to be left out of the line up in good works. As we briefly stated last week there was talk of a firm being raised with the object of buying a machine gun, this has now taken definite shape and a good start has been made. Subscription lists are now in the hands of several persons, and a goodly number have already made their donations. The Reeve, Mr. S. Collins will gladly give full particulars to anyone who wishes to help in any way. Parties in the country districts could help by getting up picnics, socials or any other function that would raise a few dollars. We expect to be able to publish the subscriptions already in hand in an early issue.

HOW WOMEN HELP

Lessons From the "Made in U.S.A." Campaign Good Results

The Hardware Age, a journal published in the United States, gives the following description of how a great organization of women supports home products:

"The Woman's National Made in U.S.A. League, with headquarters in Washington, has issued a call to the merchants of the country asking that the first week in May be set aside for a special display and sale of merchandise made in the United States. This first May week has been designated by the league as 'Made in U.S.A.' week, and extra efforts are being put forth to secure a nationwide co-operation of all the retail businesses in the country.

"This woman's league started here some six months ago with practically every prominent woman at the capital enrolled within its membership. It now has branches in every state, with state presidents and working organizations. The aim of the league is purely patriotic—to stimulate the demand for American-made merchandise. Written pledges have been received from over 40,000 women that they will demand and buy everything, whenever possible, 'Made in U.S.A.' and that they will urge their friends to do likewise."

A number of associations in this country have pledged themselves to buy "Made in Canada" goods, but a great opportunity lies before the women of Canada to urge a national campaign in favor of the manufacturers who give employment to their fathers, husbands, brothers and sons. Women are the buyers, but they cannot buy if the men get no wages, and if our goods are made abroad, foreigners instead of Canadians get the wages.

Death of Mrs. N. L. Wigle.

We are sorry to have to announce the death of Mrs. V. J. Wigle, the wife of Capt. N. J. Wigle, which took place at the residence of her daughter Mrs. D. A. McCrimmon, Calgary. Mrs. Wigle had been ill for many months, and little hope had been held out for her recovery for some time, and she expired on Saturday morning last, July 17th, at the age of 59 years.

The deceased lady was conveyed to the undertaking parlour of B. H. Armstrong. The interment took place at the Union Cemetery on Monday afternoon. The Rev. J. P. Berry and Rev. A. Esler were the officiating clergymen. The following were the pall bearers Mr. McCrimmon, Dr. G. A. Bishop, S. H. Bray, Geo. G. Huser, E. S. McKory and Chas. McKay.

To The Steady Subscriber.

How dear to our heart is the steady subscriber,
Who pays in advance at the birth of each year,
Who lays down the money, and does it quite gladly.
And casts round the office a halo of cheer.
He never says, "stop it I cannot afford it."
I'm getting more magazines now than I can read."
But always says, send it, the whole family like it—
The fact is we think it a help and a need."
How welcome his cheque when it reaches our sanctum:
How it makes our pulse throb and makes our heart dance.
We inwardly thank him, we inwardly bless him,
The steady subscriber who pays in advance.

The Mail Order House Ten Commandments.

The following ten commandments are supposed to be offered by the Mail Order Houses for the guidance of its Patrons:

1. You shall sell your farm products for cash wherever you can, but not to us, we do not buy from you.
2. You shall believe our statements and buy all you need from us because we want to be good to you, although we are not personally acquainted with you.
3. You shall send the money in advance to us to give us a chance to get the goods from the factory with your money, meanwhile you will have to wait patiently, as that is our business method.
4. You shall apply to your nearest town to aid you in building good roads, so that you can conveniently get the good from the depot, for we do not build country roads.
5. You shall buy church bells and church furniture from us and forward the money in advance, for this is our business method and you shall collect as much money from the business men in your town as you can for this purpose, for it is against our rules to donate any money to country churches.
6. You shall buy your tools from us and be your own mechanic in order to drive the mechanics from your vicinity, for we wish it so.
7. You shall induce your neighbours to buy everything from us, as we have room for more money—the less money you have in your community, the sooner we can put your local merchant out of business and charge you any price we please.
8. You shall look often at the beautiful pictures in our catalogue, so that your wishes will increase, and so you will send in big orders, although you are not in immediate need of the goods, otherwise you might have some money left to buy some necessary goods from your local merchant.
9. You shall have the merchant who repairs the goods you buy from us, look the bills, so you can send the money for his use, to us for new goods, otherwise he will not notice our influence.
10. You shall in case of sickness or need apply to your local dealer for aid and credit, as we do not know you, nor care to.

PLAY BALL.

This world's a diamond, and with the bases laid,
And on it life's great game of ball is played.
The team are human beings versus fate,
And times the umpire watching by the plate.
We're at it. Our purpose o'er and o'er,
To wield ambition's club and try to score.
To try to solve the curves the pitcher throws,
And lam the sphere where not a fielder goes.
Some of us seem to bat with skill immense,
Knocking long homers o'er the deep field fence.
Others hunt infield hits, but wildly race,
And beat the ball down to the primal base.
Still others though they strive their best;
no doubt,
Fan wildly at the air, and then—strike out;
Then seek the bench, downcast, with visage drawn.
Crestfallen, shamefaced, blue, ambition gone,
Or rag the umpire, growling like a bear:
"You robber, that decision wasn't fair."
That's not the game, be not a grouch or quitter,
What though you're not a straight 300 hitter.
You've got another chance, stand to the plate,
Grab tight your bat, get braced and calmly wait.
Wait for a good one. Let the others rip.
And when it comes—now—I am it hard and zip—
It's got to go. And so must you, old man,
Like for the base, keep going—yes, you can—
Steal second—good now, easy—not too gay,
There get a lead—a hit—now you're away.
Keep on—don't stop—don't lose that dandy stride,
You've got to beat the throw—now—slide now—slide.
Hurrah—you did it—score? Of course you scored.
See—there's your tally marked up on the board,
And now you'll win the game—no doubt at all;
You just can't lose, old man, if you'll
PLAY BALL
(The Maize).

Card of Thanks.

Capt. Wigle wishes to express his deep appreciation to the people of Crossfield and district for their kind sympathy in his recent bereavement.

Interest Boys

In the Farm

Give Him Some Stock to Raise and Sell For His Own Benefit

What is your boy doing to you on the farm? No one can tell you, and yet boy by the score leave the farm every year for town or city work. Too many of them do better at some other occupation than they would ever do at farming, but many others would have made better farmers than anything else, and with a little tact and interest would never have thought of leaving the farm.

The boy growing into young manhood has an inherent and supreme desire to have something his very own. It is this desire, perhaps, more than anything else which causes him to seek city employment. He thinks of the money which he can earn and have as his own to spend as he sees fit. In short, he wants to do for himself.

The easiest and most logical way for the farmer to interest the boy in farming, then, is to give him something to sell for himself. It is not necessary or practicable with young boys to pay stated wages, although this is advisable with the son after he has reached the age of sixteen, or known as much. The farmer should expect boys to work at 50 or 30 cents a day for the first year, and then a few cents spending money. But the main thing is to start when the boys are young to let them do as they please and satisfy them with their calling. Give the boy a few hens and let him raise chickens for sale. Do not let him sell in the fall. When he has a dozen or two, and allow him to raise and dispose of the lums as he sees fit. Make him the present owner of the place, or of the place, or one of two of the best little pigs in the litter. Never try to be good to him, but let him do as he pleases, "run" or "crippled" pigs, the puny calf, the sickly lamb, or the tubercular chickens. Do not do anything the best, which will please him the least. Nothing will so discourage the boy as working with him, and then the herd or flock, or after making a success of his feeding, to find that the stock and the money go down into the bottom of his father's pocket. There is more joy and satisfaction for the boy in bringing a lamb, pig or calf to the selling, making the sale himself, and disposing of the money according to his own desire or inclination than can be measured in money. Your boy will work each year a pig or two, a calf or a pair of lambs if so, he should have the money for his own use and soon agriculture would show a different front. Farm boys would be more eager to farm than the city boys.

Smart girls should receive like consideration. Poultry offers the best opportunities to develop their talents for business. Let them have the most of these. A nice driving or riding horse is also a fine thing for the girl, and by the way, the boy who operates a "driver" too. Girls should also have opportunities to develop their talents for music. Do not let them be expected to be scrubbing, cleaning and cooking all day long. There is much in farming besides work, worry, and the young people should be shown the brightest side of the picture.

Farmers' Advocate.

When Submarines Go Under

Must Sink Slowly, Taking at Least Five Minutes for the Process

Many people have the idea that as soon as a submarine goes down, the officer in command is a dead man, order, and almost before he has left his lip the submarine is diving beneath the waves.

As a matter of fact the very latest submarines of the world take at least clear five minutes before they can become submerged. Many of the older submarines took an hour to sink.

The reason that a submarine cannot dive quickly, like a fish, is because the water which must be let into her tanks to make her vessel would not go on an even keel, but would heel over and be in great danger of disaster. If water, too, were let in too quickly there is a danger of letting in too much and the vessel would sink like a stone to the bottom of the sea.

The depth at which a submarine travels under the sea is regulated by horizontal rudders. The water that is let in the ballast tanks is sufficient to "balance" the vessel in the sea, without rising or sinking—Pearson's Magazine.

The Italian soldier is not only severely drilled but he is also expected to perform a good many duties not usually seen in the ranks of his fellow soldiers. In the day of battle and sudden death they have been weighed in with the most modern and most advanced requirements of military service. It is considered incumbent on every man wearing the king's uniform to be able to do anything and everywhere it may be needed for the protection of life and property, against fire, accident, or disaster, and whenever calamity befalls—such as the rescue of a drowning man, or the rescue of a shipwrecked vessel, or the rescue of a man from a burning building.

Source of Inspiration

"How did that dramatic critic come to write such an unqualified review of our new play?"

"Maybe," replied the author, "he overheard some of the things you said to me about it."

Lightning Losses

Experiments in Horticulture

Protection of Buildings by Lightning

It is an old and doubtful saying that "lightning never strikes twice in the same place." However, it does strike, and it has caused destruction and death. During the month of April, throughout the province of Ontario and western Quebec, no fewer than 61 buildings were destroyed or seriously damaged by lightning. It is estimated that any of these buildings were protected by lightning rods.

Isolated and exposed as they are to the danger of lightning, it seems remarkable that so few farm buildings are equipped with this cheap and efficient protection.

Many buildings have proven their protection entirely to the fact that they were rodless, and losses on these buildings have been reduced to a minimum. According to Mr. H. Day, Professor of Physics, of Ontario Agricultural College, "out of every thousand dollars worth of damage done to unrodded buildings, by lightning, nine hundred and ninety-nine dollars' worth would be saved if those buildings were properly rodless."

This opinion is based on data compiled from investigations and reports covering ten years and including a record of 599 buildings that were struck by lightning. Of these, 100 were rodless, and 499 were rodless. Of the 599 buildings struck, 100 were rodless, and 499 were rodless. Of these, 100 were rodless, and 499 were rodless. Of these, 100 were rodless, and 499 were rodless.

Further information on the subject of lightning rods and their protection can be obtained in Bulletin 220 of the Ontario department of agriculture, supplied free to those interested.

Good Relations Existing

International Boundaries Commission

Makes Its Report

The report of the Canadian branch of the international boundaries commission appointed in 1907 by the treaty between Canada and the United States, is now being presented to Premier Borden. W. J. Stewart, on behalf of the commission, presented the report to the premier. The report was entirely unanimous.

The commission had found that there were considerable differences between the American and British claims, as shown up under the Treaty of 1820, but all the difficulties had been satisfactorily settled. In accepting the documents, Premier Borden congratulated the commission upon the conclusion of its work.

The report was entirely unanimous. The two great nations concerned have chosen this method of bringing to a happy conclusion every long-drawn-out difference over the question of international boundaries, is not only an example of good relations between the two nations, but also a happy result of the good relations between the two nations.

Life Insurance on Increase

A good barometer to the prosperity of a people is found in the amount of life insurance carried and the premiums paid. The records show that residents of Saskatchewan last year paid for life insurance over \$2,000,000, which was an increase of \$100,000 over the previous year. The health of the people may be judged from the fact that the loss was only one-tenth the amount of the premiums paid.

Not Found Wanting

The Canadian advance with magnificent steadiness—though they are new troops and have only recently received their baptism of fire—has been a source of great satisfaction to the British nation. No words can express the gratitude of the British nation to the great Dominion for the part it has played in the day of battle and sudden death they have been weighed in with the most modern and most advanced requirements of military service. It is considered incumbent on every man wearing the king's uniform to be able to do anything and everywhere it may be needed for the protection of life and property, against fire, accident, or disaster, and whenever calamity befalls—such as the rescue of a drowning man, or the rescue of a shipwrecked vessel, or the rescue of a man from a burning building.

Western Labor Problems

In 1913, when the west had its last big crop, it was necessary to employ 25,000 harvest workers from the east. Today the men on western farms are probably less in number than they were two years ago, owing to the fact that the men from the east have been called to the front.

With far more work to do, and less men on the farms, the demand for outside help will be more acute than ever before. From what source can this help be obtained?—Winning Free Press.

Rankin—Dearbrough has a terrible

shot in his head from raising his hat to the ladies.

Phyllis—That's an altogether new form of the tipping evil.

Government Bulletin Gives Some

Valuable Information to the Farmer

Director J. H. Grisdale of the Dominion Experimental Farms, expresses the hope in a letter to the minister of agriculture that the Bulletin of the division of horticulture, just issued, will be of material aid to the Canadian farmer. The bulletin contains a warrant expression of fulfillment of the hope. The Bulletin is one of 48 pages, and has been prepared by Mr. W. T. Macoun, Dominion horticulturist, and the superintendents of the branch experimental farms and stations. It tells the story of results experimentally received in all parts of the country, and under varying conditions. In the cultivation of every species of vegetable, every variety of fruit and of many descriptions of trees, plants and flowers. At this time it is interesting to look back at conditions in the corresponding period of last year. While unfavorable for early crops, 1914, we are told, was on the whole favorable. April, May and June were particularly good. Apples also recovered from the late spring frosts and have been almost a total failure but for artificially applied water.

As showing the diversity of the information supplied, it is worth while to state that in section 10, under results at the Central Experimental Farm, reports are given on the growth, cultivation and care of vegetables, fruit, plants, flowers, and ornamental shrubs. It is followed at Charlottetown, Prince Edward Island; Kentville and Nanaimo, Nova Scotia; and at Brandon, Manitoba; and at Regina, Saskatchewan; and at Lethbridge, Alberta, and at Agassiz, B.C.

Chocolate Soldiers

Captain Ben of the Commissary Bureau in the British Army in France reports, says the Westminster Gazette, that Tommy Atkins is arriving with all his minor ailments. George Bernard Shaw's "Chocolate Soldier," Chocolate "wets and, in fact, sweats" to the point of being "black" and "chocolate" soldiers.

Gentle Pirates

Women Pirates Were Not Unknown in Old Days

The most remarkable of these was Mary Read, who, born about 1690, was a prostitute at Bristol. She was recruited for the purpose of deceiving a relative from whom she had expectations.

By a remarkable coincidence, on the vessel which Captain Rackham, a notorious pirate, commanded was another woman, who posed as a man—Anne Bonney. It is said that these two, Mary and Anne, were among the bravest and most resolute fighters of the whole crew, and that when the vessel was taken by a British war ship these two heroines, along with another of the pirates, were the last three on deck, and that Mary, having in vain endeavored to rouse the courage of the crew, who had few below, discharged a pistol among them, killing one and wounding another.

Edward Teach, "Blackbeard" the pirate, was taken by a British war ship—the Bristol seaman, was the seamen article in pirates, and during the second half of the eighteenth century he was a veritable wasp to the American colonies. His vessel, the Queen Anne's Revenge, was a forty-gun, was a match even for the British frigates. He was captured by him in 1717. He would lie outside of Charleston, N.C., and swoop down upon the unsuspecting vessels. So much fear did his prowess and cruelty inspire that whole fleets of British ships were for long periods tied up in the harbor, afraid to venture out of it.

His cruelty to others—marooning of prisoners, burning of ships with the crews on board, compelling recalcitrants to walk the plank, and the other tricks of the pirate who tried to live up to a reputation for ferocity—were all accomplished by a great degree of hardness himself, though he was a woman. He was a man of a very different kind, a man of a very different kind, a man of a very different kind.

"Come," he cried, "let's make a hell of our own, and see how low we can get." With several others he went down into the hold, and there, with matches and flint, several pots with brimstone and other combustible materials, they set fire to the hold. The men were suffocated, but "Blackbeard" rejoiced in his special powers of endurance.

Fish Culture in Canada

Artificial Propagation Necessary for Restocking Our Inland Lakes

Artificial fish culture is a necessity in connection with some of Canada's inland lakes. The fishes in the first place to be raised are the whitefish, the lake trout, the lake herring, and the lake perch. These are the most important fishes in the inland lakes of Canada. They are the most important fishes in the inland lakes of Canada. They are the most important fishes in the inland lakes of Canada.

The Farmer's

Worst Enemy

A Crusade of Weed Extirpation Is Needed All Over the Dominion

In an open letter to the Manitoba legislature, written by her mother, J. A. Farmer of that province, has called public attention to the enormous loss of wheat and other crops of injurious weeds which cumber ground that should be producing valuable grain. In a letter to the Winnipeg Tribune, Mr. Kelly says:

"I have been at an elevator for fifteen minutes while they were shoveling with a board the noxious weed seeds down into the bins to be cleaned and elevated, and from a seventy bushel load twenty-three bushels was the amount of wheat cleaned out of the load, not what wheat, mine is still clean."

The extent to which weed pollution has gone in this case seems almost incredible, only twenty-three bushels of wheat to forty-seven bushels of weed seeds—actually less than one percent of the total mixed crop of the farm. It should be borne in mind that the mixed crop is quite unsatisfactory in its effect on the soil as a crop of clean wheat would be, and the presence of the weeds adds greatly to the cost of the expense of handling and marketing the grain. It is a loss to the farmer, and a loss to the nation.

It can produce only a certain amount of wheat, and the rest is lost. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation.

It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation.

It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation.

It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation. It is a loss to the farmer, and a loss to the nation.
